

### Section 1

5

Write down the missing numbers.

(a)  $15 \times 100 = \square$

(f)  $50 \times 200 = \square$

(b)  $297 \times 10 = \square$

(g)  $70 \times 70 = \square$

(c)  $741 \times 1000 = \square$

(h)  $140 \times 30 = \square$

(d)  $35 \times \square = 3500$

(i)  $60 \times \square = 3600$

(e)  $142 \times \square = 1420$

(j)  $500 \times \square = 150000$

### Section 2

15

Work out the following long multiplication questions.

(a)  $42 \times 35 =$

(b)  $2700 \times 40 =$

(c)  $320 \times 450 =$

- (d) A builder requires 65 pieces of expensive timber. The timber costs £126 a piece. What is the total cost of the timber?

### Section 3

10

Use the following answer to work out the questions below.

$$5300 \times 120 = 636000$$

(a)  $5300 \times 12 =$

(d)  $5300 \times 1200 =$

(b)  $530 \times 120 =$

(e)  $53 \times 12 =$

(c)  $120 \times 530 =$

(f)  $530 \times 1200 =$

- (g) What do you notice about your answer to part (f)?
